Encyclopedia of Awards

Merriam-Webster defines an encyclopedia as:
"A work that contains information on all branches of knowledge or treats comprehensively a particular branch of knowledge…"

St Regis offers the most comprehensive collection of Awards & Recognition in North America. As the leaders in recognition, our selection of products continue to remain the world's largest. From exclusive crystal and cast metal work of art, to stone, art glass, wood and a variety of other materials, the range of our selection is unparalleled. If you can't find the product you need for your event, it probably doesn't exist. However, if for any reason your exact request cannot be found, our custom divisions will create the perfect award for your requirements.

Trust the Experts. Contact our award winning customer service team today and put our experienced artisans to work turning your request into a masterpiece of recognition.

Ebony optical crystal is fabricated into these classic tower and obelisk shapes, then sliced and inserted with aqua blue optical crystal. After the pieces are joined together the entire shape is smoothed and polished to create this modern masterpiece of craftsmanship; mounted to a black nickel finished cast metal base.

Voyager

Inspired by the famous Winged Victory displayed in the Louvre, the Voyager proudly spreads it's wings to announce the success of your performance. Cast glass, using the painstaking pate de verre lost wax casting method, envisions this incredibly detailed award for your next victory.

Recognition Tower

Recognition should be designed to acknowledge specific accomplishments, be tied to business goals and have a tangible reminder of the accomplishment. These optical milestone towers help each employee build their own tower of recognition. Start with the base and include a company logo or mission statement - everything needed to identify a corporate culture. The next block should be the cap; then every block that follows interlocks between the cap and base. Give a block for each landmark event:

Never has the symbol of leadership stood more proudly than in the Paramount Eagle sculpture. The detailed wings are raised in a brave salute to your accomplishment and are plated in bright gold or antique silver. The figure is mounted to either rosewood stained piano finish wood or black marble base with complimenting plate.

When your team Rocks, say it with a rock…or a stack of rocks. These Stacked Stone and Single Stone Awards are a perfect way to give a message important enough to be "carved in stone". This is the perfect desk award, sure to be picked up - and when it is, add a lasered plate to the bottom for a mission statement or personal message - when you turn over a stone, you never know what will be uncovered.

ART AS AWARDS

MARK
Rosenbaum

The Amber Amphora is commissioned by master American glass artist Mark Rosenbaum. This huge glass vase is swirled in amber, red and brown molten glass and then blown to this amazing size. After creating the colors, the shape is encased in clear glass and while still glowing hot, clear handles and a ridged base are applied to the sides. This gleaming construction of color and light sits on an optical ebony crystal base.

THOMAS *Kelly*

Thomas Kelly is one of America's premier glass artists.

The Frosted Sapphire award is created at his studio using deep blue glass and is blown into this graceful elongated shape. While still glowing hot, each clear glass swirl is applied individually; wrapping around the shape. It takes great skill to curve and stretch the molten glass into this graceful coil. After cooling, the clear parts are sandblasted to acheive a frosted halo. The award is finished with a clear optical crystal base with your accomplishment etched on the side.

EXCLUSIVE DESIGN

ST REGIS GROUP

The thrill of victory should last long after the game ends. These Sports Awards are created to recognize a moment in time and to keep memorable triumphs alive forever. These fully modeled football and basketball awards are produced in the USA from thick polished brass, then mounted to quality American walnut handcrafted bases. R.S. Owens sports ball awards are the quality that others aspire to.

R.S.OWENS

A Tradition in Excellence.

We are pleased to present this portfolio of our custom work.

Many things have changed since R.S. Owens began designing and manufacturing awards in 1938. Today we use the latest design programs and sophisticated manufacturing techniques to refine your award to perfection.

There is one thing that has not changed.

When we produce your custom award there is still no substitute for handcraftsmanship. Our skilled tradespeople have learned their trade through decades of experience. Many of them have even apprenticed in our shop. Every award we make is touched by the many hands of our workforce.

Whether your award is hand cast, polished and electroplated in our foundry; CNC milled, fabricated and lacquered in our workshop; or kiln-fired, shaped and fused in our hot shop, you can be assured that the R.S. Owens stamp of quality is as important to us as it is to you. To see more of our work ask your customer service representative for a copy of our Custom Portfolio or visit us at rsocustomawards.com

Product Descriptions

OPTICAL CRYSTAL

Optical Crystal, as clear and as flawless as used in binoculars and camera lenses, represents the ultimate expression of excellence. Optical Crystal is manufactured in large sheets up to 4" thick, and while still molten, is subjected to tremendous pressure to ensure no bubbles, flow lines or other distortions.

Optical Crystal is 100% Lead Free and extremely hard. It is the hardness that provides the basis for the brilliant cuts and bevels, as well as the ultra high polished surfaces. Each piece of Optical Crystal is hand polished and beveled. What an ideal way to recognize achievement and express appreciation.

24% LEAD CRYSTAL

Most fine crystal contains lead oxide. Although some manufacturers claim up to 30% lead content, 24% is the optimum percentage of color, weight and hardness, while still ensuring clarity, sparkle and brilliance.

24% Lead Crystal, with its exceptionally high perceived value, has been sought after and treasured for generations, and remains a status symbol even today.

LEAD FREE CRYSTALLINE

Lead does not leach from Lead Crystal products, and has passed the stringent safety tests of the FDA. More and more manufacturers have begun substituting Zinc Oxide, and some have even managed to eliminate all metals, and still retain the brilliance in color, weight and clarity.

Please look for the "Lead Free" logo. This is your assurance that these products meet the high standards, but are completely Lead free.

STARFIRE CRYSTAL

Starfire Crystal is lead free, and also has low iron content. The removal of this pigmentation results in a product that is equal in clarity to all but the finest optically clear crystal.

Starfire Crystal is manufactured in varying thicknesses up to ¾". Due to the extreme clarity of Starfire Crystal, the highly polished bevels and edges create a beautiful reflects, with a slight blue sparkle.

JADE CRYSTAL

The iron ore content is the silica sand used to produce Jade Crystal results in the distinctive green tint which has become so popular in the trophy industry. Jade Crystal is very hard, facilitating steep bevels and capable of being finished to a very high polish level.

Jade Crystal is manufactured in varying thicknesses up to ¾". The thicker the piece, the more distinctive the green tint, especially when viewed from the edge. The contrast of color created by Deep Etching has made Jade Crystal a very popular choice for Award and Recognition pieces.

GENUINE MARBLE

It takes millions of years for mother nature to create natural stone. There are many factors that affect the ultimate graining and coloration of natural marble, including underground springs, mineral deposits, earth shifts, temperature, natural solutions in the earth, and the pressure exerted on these elements over time. Because of the vast differences in the conditions that created the stone, every block extracted from the earth is different. The naturally occurring veining patterns add a sophisticated element to your award and since no two pieces are exactly alike, your Genuine Marble award is uniquely yours.

18/8 STAINLESS STEEL

The most commonly used Steel in cutlery and high-end cookware and drinkware is the 300 series, also known as “18/8” for its composition of 18% chromium and 8% nickel. This composition of Stainless Steel is most widely used in the food service and brewing industry because of its superior corrosion resistance. Look out for the 18/8 logo and rest assured that your Stainless Steel gift is of the highest restaurant quality.

DEFECTS IN MATERIAL AND WORKMANSHIP WILL BE CORRECTED WITHOUT CHARGE ...

However, please be aware that even in the finest crystal, minor variations in clarity and color can occur. Occasional air bubbles, chill marks or flow lines are inevitable, especially in molded or blown crystal products. In order to obtain the optimum finish, extra polishing may be necessary, which may cause variation in size. These minor variations in size, quality, color and clarity are not considered defects.

Genuine Marble is becoming increasingly popular for Awards and Gift items. Marble is a natural product, with no two pieces identical. Some veining is inevitable, which adds to the natural look and beauty. The veins in Marble are not considered defects.

ViViDPRINT™

St Regis is proud to offer our optional VividPrint™ Spot Color Process to our line of awards and corporate recognition products. A colorful alternative to our classic etching process and a great way to enhance your logo and message. With over 16 million colors to choose from, VividPrint™ Spot will turn your prestigious awards into marvelous works of art. See page 882 for Pricing.
